

New Product Information

DAMPER ZZR

- Length adjustable, fully tapped mono-tube shock absorber kit
Single tube type dampers are used for all applications. Large diameter, $\phi 44$ mm low friction piston provides speedy and smooth road tracing capability and comfort.
- 32-levels adjustable damping
Damping rate can be adjusted for 32 levels both front and rear. Wide adjust range can match very wide condition from street to the race course, and provides both driving performance and comfort,
- Durable shock absorber
Spring seat rings and upper mounts are red anodized forged aluminum. Mounting brackets are matt black. Cylinder case is coated with black chrome for high anti-corrosion capability. Bearing-type spring upper seat is employed for longer life, for strut application models.
- Overhauling
DAMPER ZZR can be overhaul and refreshed to recover the performance from prolonged usage.

Available date: February 25th, 2010
