

New Product Information

SUCTION KIT

- By redesigning the shape and internal diameter of the stock suction pipe, flow resistance is reduced to improve the flow efficiency, resulting better engine response.
- Turbocharger side ID is enlarged from 45mm to 55mm. Air cleaner side ID is enlarged from 60mm to 70mm with minimum bend, straighter path.
- Main body is cast Aluminum with buff polished finish, and blue silicone is used for joint hoses for durability and safety and better look in the engine room.
