

Additional Application

- Mono tube type shock absorber is used for all lineup:
Low friction, large 44mm diameter piston quickly responds to the input for initial damping to achieve the comfortable ride and controllability.
- Damping rates are 32-way adjustable for both front and rear:
Wide adjustability results in the high balance of the driving performance and ride comfort, from the street to the circuit.
- High Durability is achieved:
Red anodized, forged aluminum upper mounts, matt black painted brackets, and black chrome plated cylinder cases are used for anti-corrosion performance. To extend the life of the pillow ball, bearings type upper seats are used for strut type applications..
- Can be overhauled:
DAMPER ZZ-R can be overhauled even though priced low. Since the damper wears out over the time, the original performance of the damper can be recovered by overhauling.
