

## Additional Application

- All line up has adopted single cylinder type (monotube), full length adjustable shock absorber.  
Single cylinder/upright structure is adapted to all lineups. By 46mm of wide and low friction piston (Excluded to some vehicle), controlling initial attenuation delay, realizing smooth and flexible ride ability.
- Adopted Sub tank structure.  
Adopted sub tank structure, maintain oil level and enough damping force from very low speed. Abolished hose line peculiar structure of sub tank (Excluded to some vehicle), reducing trouble when installing.
- 32 way of damping force adjustment  
Adopted 2 WAY damping force adjustment of expansion 32 / contraction 32. Wide range adjustment balancing makes high dimension of controllability and comfortable driving feeling, from street to Circuit.
- High endurance of shock absorber.  
Using high quality materials, Black chrome plated adapted to cylinder case and Nickel plated and special coating (Alumite coating for Aluminum) adapted to improving of corrosion-resistance.

Vehicle Information							
Vehicle	Model Year	Model	E/G Model	MSRP w/tax	MSRP	Code No.	JAN Code
MAZDA							
RX-8	08/03-	SE3P	13B-MSP	¥270,900	¥258,000	93126	4959094931263

Product and price are might be modified for improvement without notice, also, above setting vehicle will discontinue without notice.
