

## Additional Application

- Mono tube type shock absorber is used for all lineup:  
Low friction, large 44mm diameter piston quickly responds to the input for initial damping to achieve the comfortable ride and controllability.
- Damping rates are 32-way adjustable for both front and rear:  
Wide adjustability results in the high balance of the driving performance and ride comfort, from the street to the circuit.
- Can be overhauled:  
DAMPER ZZ-R can be overhauled even though priced low. Since the damper wears out over the time, the original performance of the damper can be recovered by overhauling.
