

New Product Information

- Mono tube type shock absorber is used throughout the range.:
A low friction, large 44mm diameter piston quickly responds to inputs for initial damping, allowing a comfortable ride with excellent controllability.
- Damping rates are 32-way adjustable for both front and rear:
Wide adjustability results in a high balance of driving performance and ride comfort, from the street to the circuit.
- Can be overhauled:
DAMPER ZZ-R is low priced, but can still be overhauled. Dampers wear out over time, but original performance can be restored by overhauling.
