

Additional Application

Racing Brake System

- The Model specific brake caliper kit has outstanding braking ability and controllability.
- By utilizing a lightweight aluminum body, weight is minimized while having high rigidity.
- The 2 piece floating rotor reduces overall weight and heat strains while increasing cooling efficiency.
- The kit includes Stainless Mesh Teflon brake lines.
- The bright metallic red calipers and the black bell housing produces a toned leg work.
- High braking ability and controllability of the brake system was proved by the RACING PROJECT Tsukuba attack vehicles.
