

New Product Information

OIL SENSOR ATTACHMENT

- This attachment is able to take PRESS as well as TEMP readings by being installed between the stock oil filter and the engine.
- Compatible with the Subaru FA, FB and the Honda S07A engine.
- Come with a M20-P1.5 center bolt which has a height of 44mm.
- The O ring fits $\phi 65$ size.
- Since the ideal mounting locations for the sensors will vary between vehicles, the attachment is threaded with three 1/8 PT holes.
- The product includes two 1/8 PT tapered plugs.
- The attachment is engraved with the 「BLITZ」 logo.

Product Composition

Installation on the TOYOTA 86

Installation on the HONDA S660
