

New Product Information

Strut Tower Bar

- A hollow structured aluminum shaft with a width of 50mm, thickness of 15mm has been utilized to make the Strut Tower Bar tough and light.
- Distortion of the body during cornering and braking is prevented while the full potential of the suspension can be drawn out for optimal driving ability.
- After the shaft has been blasted, it has been treated with a special black coating which is highly resistant to scratches. Furthermore the 50mm wide shaft will have a strong presence in the engine room.
- The BLITZ logo has been engraved by a laser for high durability and quality.
- All of BLITZ's technical expertise has been put in to make the vehicle specific brackets have high strength. Furthermore, Red Metallic Paint has been applied for dressing up the engine room.
- Designed so the motor for the DAMPER ZZ-R DSC can be simultaneously equipped.

Part No:96112 MAZDA ROADSTER
