

## Additional Application

# Brake Hold Jumper

### 【Product Characteristics】

- The 『Brake Hold Jumper』 can automatically regulate the Brake Hold function in order to keep vehicles at rest without pressing on the brakes. The Brake Hold function is a convenient mechanism which keeps vehicles at rest when you stop at the traffic light. However whenever the engine starts, the function is turned OFF. By equipping the Brake Hold Jumper the Brake Hold function can be linked to turn ON when the engine is started, or when the seatbelt is equipped. Frustrating operations after the engine is turned on will be eliminated.
- Vehicle specific connection and layout.
- All necessary parts for connection is included.
- Built in function to convert back to normal conditions.  
When the Brake Hold Jumper is not needed, a simple operation can bring back the stock conditions.

Product Information				
Code No.	Product Name	MSRP	JAN Code	Product Composition
15804	Brake Hold Jumper NX/RX	¥15,000	4959094158042	Vehicle Specific Harness with Control Circuit, Main Unit, Short Parts

- ※ Some Vehicles will link the connection of the seatbelt with the Brake Hold Function turning ON/OFF.
- ※ Please read your vehicle manual thoroughly and have a good understanding of the Brake Hold function`s operating conditions and precautions before using this product.
- ※ Do not be overconfident in the Brake Hold function`s ability and always be prepared to operate the brakes and steering.
