Remarks	Includes 150mm Extension Dials	

※Abbreviation for Spring Types 「ST:ID62 Straight Spring」, 「BS:Barrel or Tapered, Vehicle Specific Springs」

※Adjustability in ride height may vary between vehicles.

### ■Precaution During Installation

- The 150mm extension dials are for adjusting the front damping force.

The metal panel on the upper mount and plastic service panel must be modified in order to install the dials.

If the dials are not mounted, the damping force will only be adjustable when the shock absorbers are uninstalled.

- Since the rear damping force dials are located inside the wheel well, the wheels must be removed in order to gain access.

### ■Other Remarks

- Vehicle roll is minimized for a sportier and more comfortable ride quality.
- The suspension has been set to maximize the compression and rebound stroke for a smooth ride.
- Stylish form can be achieved by lowering your vehicle.
