■Precautions During Installation

- The front tire and inner fender may come in contact after lowering your vehicle.
- Noise created from the shock absorbers may become more noticeable due to the pillow ball mounts.
- The trunk side panel must be modified in order to install the rear shock absorbers.

■Other Remarks

- Common for GR model.
- Camber can be adjusted with the pillow ball front mount.
- The spring rate has been increased from the DAMPER ZZ-R.
Body roll has been minimized for daily driving and for the circuit.
- Adjustable front stabilizer links are included for proper installation during different ride heights.
