※Abbreviation for Spring Types 「ST:ID62 Straight Spring」, 「BS: Barrel or Tapered, Vehicle Specific Springs」

※Adjustability in ride height may vary between vehicles.

### ■Precautions During Installation

- Since the rear damping force dials are located inside the wheel well, the wheels must be removed in order to gain access.
- The suspension arms and body may come in contact when lowering your vehicle.

### ■Other Remarks

- Installation has been tested for vehicles after the minor change.
- Camber can be adjusted with the pillow ball front mount.
- Bump rubber specifically for the rear suspensions are included to improve ride quality when lowered.
- Settings for the spring rate and damping force has been developed for comfortable daily driving.
