### ■Precautions During Installation

- The data on ride height adjustability has been taken from ASU65W.
- Since the rear damping force adjustment dials are located inside the wheel well, the wheels must be removed in order to make adjustments.

### ■Additional Remarks

- Cornering performance can be improved by lowering the center of gravity.
- By lowering the vehicle, stylish form can be achieved even for an SUV.
- For optimum ride quality, make changes to the damping force depending on the number of passengers and road conditions.
