■Precautions During Installation

- The data on ride height adjustability has been taken from GFC27 Highway Star model.

■Additional Remarks

- Cornering performance can be improved by lowering the center of gravity.
- For optimum ride quality, make changes to the damping force depending on the number of passengers and road conditions.
- Autonomous driving technology ProPILOT has been tested to properly function.

However there is a possibility for the ProPILOT system to not work if the location of the radar, camera, and sensors are altered after the vehicle is lowered.
