■Precautions During Installation

- Since the rear damping force adjustment dials are located inside the wheel well, the wheels must be removed in order to make adjustments.
- The data on ride height adjustability has been taken from KF2P.

■Additional Remarks

- Cornering performance can be improved by lowering the center of gravity.
- Smooth ride quality has been made possible by making sure the suspension has sufficient compression and rebound strokes.
- By lowering the vehicle, stylish form can be achieved even for an SUV.
- Increase the damping force to improve stability on the highway.
