

New Product Information

THRO CON for Plug in Hybrids!

e Thro Con
THROTTLE CONTROLLER

■ Product Characteristics

- The new throttle controller 「e Thro Con」 has been released specifically for electric, Nissan E-POWER, and plug in hybrid vehicles.
- Compared to previous models, the characteristic for the ECO and SPORT mode has been amplified.
- There are a total of 20 modes to choose from such as 5 「EV ECO mode」, 10 「EV SPORT Mode」, and 5 「AUTO Mode」.
- “Simple Mode Function” allows the driver to easily access the top 5 most frequently used modes.
- VA Liquid Crystal Display shows a higher level of contrast for better visibility. Bar graph and digital display can show the throttle opening level.
- All necessary parts for installation are included in the vehicle specific packaging.
- Memory function allows the driver to set which mode to activate during ignition.
- Safety function will return the throttle to normal conditions if any problems are detected.
- When the vehicle is put into reverse, the throttle will automatically return to normal conditions.
- Install the Scramble Switch, and Start Control System Harness (Sold Separately), to access additional modes.

BLITZ INFORMATION

EV ECO Mode、EV SPORT Mode

- The EV ECO and EV SPORT Mode changes the acceleration response while maintain a consistent ratio.
- 「EV SPORT Mode」 has a total of 10 modes from ES1～ES10. As the mode number increases, the control ratio for response is increased. 10 has the highest ratio.
- 「EV ECO Mode」 has a total of 5 modes from EE1～EE5. Compared to stock, the response becomes milder to support eco-friendly driving.

AUTO Mode

- During AUTO mode the computer automatically regulates the control ratio depending on the amount and time the throttle is opened.
- The characteristic of each of the 5 modes are distinct to allow drivers to find their favorite setting.
- When acceleration is released, the ratio will mirror the input values. When the control ratio changes, the bar graph on the monitor will slide.
