

## Additional Applications

### **RACING RADIATOR HOSE KIT**

- The Radiator hose has been made from triple layer silicone with superior heat and pressure resistance.
- The product is heat resistant up to 180°C, and able to withstand 400KPa of pressure.
- Due to the vehicle specific design, the product can be installed without any modifications.
- Stainless steel hose clamps necessary for installation are included.
- Can be installed along with RACING RADIATOR TypeZS. (The hose must be cut for proper installation)
