【 Modes 】

● ECO ・ SPORT Mode

The ECO and SPORT mode changes the acceleration response while maintaining a consistent ratio.

SPORT mode includes SPORT 1~9 and MAX for a total of 10 modes.

As the mode number increases, the control ratio for response is increased. MAX has the highest ratio.

ECO mode includes ECO 1~5.

Compared to stock, the response becomes milder to support ecofriendly driving.

ECO4 (EC.4)

SPORT3 (SP.3)

● AUTO Mode

During AUTO mode the computer automatically regulates the control ratio depending on the amount and time the throttle is opened.

The characteristic of each of the 5 modes are distinct to allow drivers to find their favorite setting.

When acceleration is released, the ratio will mirror the input values.

When the control ratio changes, the bar graph on the monitor will slide.
