- Vehicle specific suspension kit fitted with full length adjustment, mono-tube structure, and an electronically controlled damping force of 96 levels. While being reasonably priced, aluminum parts are employed to reduce weight and maximize rigidity.
- The damping force can be easily adjusted from a controller inside your vehicle (Choose from 96/64/32 levels of adjustment). By utilizing a stepping motor, a maximum of 96 levels of adjustment is possible to finely tune the vehicle setup for your desired ride quality.
- The right and left side of the vehicle can be regulated simultaneously or all 4 wheels can be managed independently. 5 of your favorite settings can be memorized for different circumstances.

※ Adjustability in ride height may vary between vehicles.

※ Even if Touch-B.R.A.I.N. connection is listed as 「○」, some models depending on the manufactured year may not be able to link.

Please check the Touch-B.R.A.I.N. vehicle compatibility list for more information.

※ The data on ride height adjustability has been taken from LEAF (ZE1).
