

New Product Information

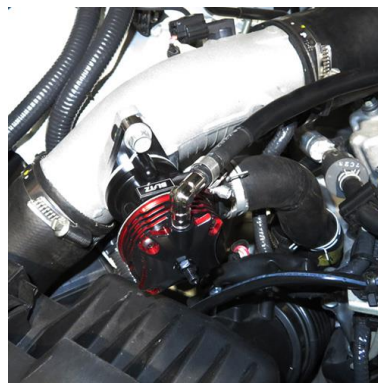

SUPER SOUND BLOW OFF VALVE **BR** *BLOW RESPONSE*

- High quality aluminum die cast bodies have been utilized. Immediate response and smooth movement have been achieved by optimizing product clearance through high precision CNC machining.
- DEFRIC coated pistons have been employed to resist corrosion and for providing excellent lubrication performance.
- Corrosion resistant special black coating and red alumite have been applied for the body.
- The flange design and funnel size are the same as the previous model to allow interchangeability.
- Vehicle specific springs have been selected to prevent engine idle problems.
- By employing Venturi funnels the flow velocity has been increased by 17% for a sharper and more forceful release sound.
