

Additional Applications

Brake Hold Jumper

LEXUS RX450h

【Product Characteristic】

- The 『Brake Hold Jumper』 can automatically regulate the Brake Hold function in order to keep vehicles at rest without pressing on the brakes. The Brake Hold function is a convenient mechanism which keeps vehicles at rest when you stop at the traffic light. However whenever the engine starts, the function is turned OFF. By equipping the Brake Hold Jumper the Brake Hold function can be linked to turn ON when the engine is started, or when the seatbelt is equipped.
- Frustrating operations after the engine is turned on will be eliminated
- The product has been designed vehicle specifically.
- All necessary parts for connection is included.
- Built in function to convert back to normal conditions.

When the Brake Hold Jumper is not needed, a simple operation can bring back the stock conditions.
