

## Additional Applications

Product Composition (TUNERS KIT)

### 【 Product Characteristic 】

- Actuator type metal flow turbine specifically designed for the 86/BRZ.
- With a maximum output of 260PS and 300 N·m of torque, forceful acceleration can be obtained all the way to redline. (Stock engine with BLITZ ECU settings.)
- BLITZ original B06-380R turbine has been employed.  
The compressor housing has been specially coated to limit corrosion and wear.
- Equipped with turn-buckle type actuator.
- The kit includes a catalyzer to pass the Japanese emission standards. The TUNER KIT includes all parts necessary for installation. The STARTUP KIT includes turbo specific ECU. The FULL KIT contains the SBC typeS boost controller.
