

Additional Applications

Strut Tower Bar

- 50mm wide, 15mm thick hollow aluminum construction is utilized for a light weight but rigid Strut Tower Bar.
 - By reducing the distortion of the body during cornering and braking, the suspension's full capability can be brought out to improve the vehicle's maneuverability.
 - After the shaft has been blasted, it has been treated with a scratch resistant special black coating. Along with the high quality finish, the 50mm wide shaft has a strong presence in the engine room.
 - The BLITZ logo has been laser inscribed for high durability and quality.
 - The Brackets has been designed with BLITZ's acquired knowledge to maximize rigidity for each specific vehicle.
- Furthermore, red metallic paint has been applied to dress up the engine room.
- The tower bar can be installed along with the DAMPER ZZ-R SpecDSC PLUS.
