- Product Description
- Industry first Full Auto Mode is able to automatically adjust the damping force depending on how the vehicle`s balance changes depending on variables such as road condition and number of passengers.
 - The UP/Down switch has been enlarged and an additional rotary switch has been employed to make complex operations easier.
 - The damping force can be easily adjusted from a controller inside your vehicle (Choose from 96/64/32 levels of adjustment). By utilizing a stepping motor, a maximum of 96 levels of adjustment is possible to finely tune the vehicle setup for your desired ride quality.
 - During map control mode, variables such as rotational G, acceleration G, and vehicle speed are taken into account when automatically adjusting the damping force. G can be displayed in real time and its peak value can be shown as well.
 - Total of 22 presets can be saved. The ADVANCED mode allows complex and detailed management of the damping force.
 - With the separately sold GPS sensor kit, the vehicle speed can be easily inputted.
