

Additional application for the MIRACLE STROKE ADJUSTER has been confirmed for the Subaru BRZ (ZD8)

MIRACLE STROKE ADJUSTER

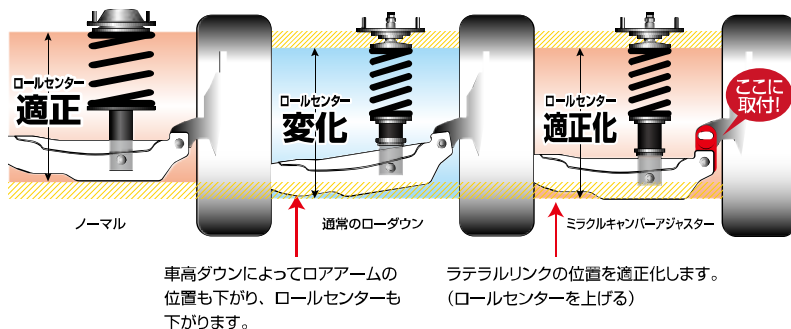

- Product Name : BLITZ MIRACLE STROKE ADJUSTER
- Compatible Vehicle : SUBARU BRZ
- Vehicle Model : ZD8
- Engine Model : FA24
- Model Year : 2021/08-
- MSRP w/tax : ¥44,000-
- MSRP : ¥40,000-
- Code No. : 92105
- JAN Code : 4959094921059

■ Product Characteristic

- By installing this product onto the rear lower arm, the position of the lower arm can be optimized. Even while lowered, adequate stroke can be maintained with this bracket.
- For lowered vehicles, the stroke length is usually sacrificed. However, by increasing the stroke amount, lowered vehicles can maintain a well-balanced ride quality.

■ Product Image

Installation Example

■ Precautions During Installation

- ※By installing this product the ride height will be lowered by 30mm and the adjustment range will become -80mm~-30mm. Please adjust the vehicle height accordingly.
- ※For wheels of a certain size, the lower arm and the wheels may contact each other.
- ※The camber adjustment range is between $-5^{\circ}00'$ ~ $-2^{\circ}00'$. When adding more camber, the toe measurements will be altered as well. For greater toe adjustments please purchase other necessary parts.
- ※This product does not require submission of structural modification during the Japanese vehicle inspection. However, depending on the inspector you may be asked to submit proper paper work for the changes. Please contact your local inspecting office beforehand and if proper documents are required, we will send you the paper work for structural modification.
