

Additional applications for the BOLT ON TURBO SYSTEM
has been confirmed for the R35 GT-R

[Click here for further information on the BOLT ON TURBO SYSTEM](#)

Product Characteristics

- Bolt on turbo chargers for the R35 GT-R can be swapped with the stock system to achieve 750PS.
The highly reliable IHI turbo chargers have been utilized and designed to be compatible with the stock catalytic converter.
- By utilizing a turn buckle actuator, the initial boost pressure can be adjusted.
- The product is directly bolt on for 2020 models equipped with segmented exhaust manifolds.
- Machined out of aluminum the compressor wheel is larger than stock but lighter by 1.8g.
- Compared to the previous model, the turbine wheel and wings have been redesigned to significantly improve response at low rpm.
 - ※ The product only includes the turbo chargers.
 - ※ Please be aware that by installing this product, Nissan`s warranty will be void.
 - ※ To install this product on vehicles made before 2019/06, the exhaust manifold and heat shield from models made after 2019/06 must be purchased and installed.
 - ※ In order to install this product, the engine must be removed.
Please have a professional with expertise in the field install the product for you.
We will not be able to provide you with installation support.
 - ※ The injector and fuel pump must be changed to a larger type since the stock capacity will be insufficient.
ECU Settings such as boost pressure, fuel, ignition timing must be recalibrated.
The product does not come with injectors, fuel pump, or ECU settings.
Please have a professional install the necessary parts and adjust the settings.
 - ※ We will not take any responsibility for any damages that may occur to the vehicle after installing this product.

■ Necessary Replacement Parts

- When removing the engine and stock turbo charger, please prepare new parts that are designated as non-reusable.
- Even if the part may be reusable, it is best to install new parts since they may be worn or fatigued.
- The parts shown in the list below are just for reference.
- Other parts may be necessary when removing the engine or if other work is being done.

※ The parts below are not included in the product. The price shown below are from February 2022.

Stock Part Number	Product Name	MSRP (without tax)	Amount
A4D01-JF00A	Gasket Kit, Turbo Charger	¥5,200	1
14036-JF04A	Gasket, Exhaust Manifold ※1	¥1,740	2
14094-JG30A	Nut, Exhaust Manifold ※1	¥140	12

※1. Parts necessary for models made after 2019/06 when removing the exhaust manifold.

- Coolant : Roughly 11.3L
- Engine Oil : Oil Change Only 4.5L , When Changing the Oil Element 5.0L

■ Models made before 2019/06 will require the following parts as well as the parts from the previous page.
Please prepare the parts before hand for proper installation.

※ The parts below are not includes in the product. The price shown below are from February 2022.

Number	Stock Part Number	Product Name	MSRP (Without Tax)	Amount
①	14004-6HT0A	Manifold, Exhaust Bank 1	¥51,500	1
②	14006-6HT0A	Manifold, Exhaust Bank 2	¥51,500	1
③	16590-6HT0A	Cover, Exhaust Manifold Bank 1	¥5,740	1
④	16590-6HT0B	Cover, Exhaust Manifold Bank 2	¥5,740	1
⑤	14450-6HT0A	Heat Insulator, Turbo Housing Bank 1	¥3,370	1
⑥	14450-6HT0B	Heat Insulator, Turbo Housing Bank 2	¥3,370	1

The Heat Insulator is the same for all models and can be used along with the product.
