- MSRP w/tax : ¥33,000-
- MSRP : ¥30,000-
- Code No. : 93151
- JAN Code : 4959094931515

■ Product Description

- The product allows smoother movement of the suspension and increases tire contact with the pavement.
- Change the alignment setting were the stock arm is unable to.
Relocate the rear tire either forwards or back.
- Greater range of setting can be achieved for racing on the circuit and for styling your car for the street.
- Compared to stock the adjustability is between -10mm~+14mm.

■ Installation Example

■ Remarks

- ※For vehicles in Japan, registration for structural changes must be made when installing this product.
The product includes the necessary paperwork to prove its structural integrity.
