

Additional Application for the Power Con has been confirmed for NA and Hybrid Vehicles.

Power Con NA

POWER CONTROLLER

[Click here for more information on Power Con](#)

Product Characteristics

- Power is increased by regulating the airflow sensors on NA and Hybrid vehicles,.
- The airflow sensors are regulated within the limits of the stock ECU to minimize the burden on the vehicle.
- There is an ON/OFF switch on the Power Unit to allow conditions to be returned to stock if necessary.
- Does not require any additional wiring modifications due to the plug and play design.
- The product can be easily installed since all connections are made within the engine room.
- Does not require any complicated setting procedures and power is immediately increased after installation.
- Includes all necessary parts for installation.

- ※ Depending on the individual, the sensation for the improved acceleration, response and power may differ.
- ※ The POWER UP values listed on the product information shows the difference in output between vehicles equipped with Power Con and stock. All measurements taken by in house chassis dynamo.
- ※ Output may differ depending on the vehicle. Please keep in mind that these values are only for reference.
- ※ The product can be equipped along with the BLITZ AIR FILTER Series and AIR CLEANER Series.
Has not been tested with air filter, air cleaners from other manufacturers.
- ※ Cannot be equipped on vehicles with rewritten ECU (Including BLITZ TUNING ECU), replaced ECU, or vehicles equipped with electronic parts attached to the boost sensor or air flow sensor.
