### Product Characteristics

- By optimizing the boost pressure for turbo vehicles, more power can be obtained.
- Settings are taken vehicle specifically.
- Boost is increased within the level of the stock ECU to minimize the burden on the vehicle.
- Does not require any additional wiring modifications due to the plug and play design.
- The product can be easily installed since all connections are made within the engine room.
- Does not require any complicated setting procedures and power is immediately increased after installation.
- Includes all necessary parts for installation.
