

Additional Applications for the BLITZ Strut Tower Bar has been confirmed for the TOYOTA AQUA After MC(MXPK11, MXPK16)

Strut Tower Bar

[Click here for further information on the Strut Tower Bar](#)

Product Description

- 50mm wide, 15mm thick hollow aluminum construction is utilized for a light weight but rigid Strut Tower Bar.
- By reducing the distortion of the body during cornering and braking, the suspension's full capability can be brought out to improve the vehicle's maneuverability.
- After the shaft has been blasted, it has been treated with a scratch resistant special black coating. Along with the high quality finish, the 50mm wide shaft has a strong presence in the engine room.
- The BLITZ logo has been laser inscribed for high durability and quality.
- The Brackets has been designed with BLITZ's acquired knowledge to maximize rigidity for each specific vehicle. Choose between red or blue version to dress up the engine room.
- The tower bar can be installed along with the DAMPER ZZ-R SpecDSC PLUS.
